

# Let's Find a Dragonfly!

Sri Widyowati Kinasih  
Nabila Adani

All students have a homework to do this weekend. They must observe insects. They can work in pairs or groups. Some choose to observe ants, and some others will observe grasshoppers.

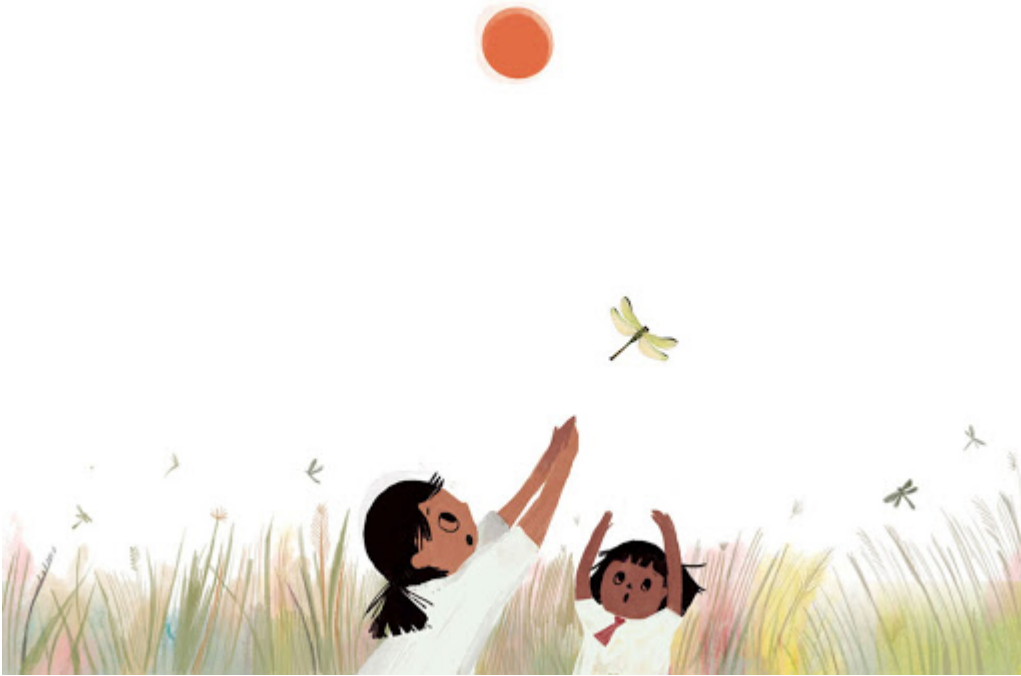

Trisna ask sukma to researching about gresshoppers. Gressophers? Sukma does not sure. Is it true that grasshoppers is an insect?

There must be lots of dragonflies here. Let's find them!

Pop! Trisna is trying to catch the dragonfly. Oops, she misses it.

Psst ... !

Trisna gets one, but she quickly lets it fly. "It tickles!"

"Just use this!" Sukma offers.  
"No! This tool will hit the dragonfly and kill it!" Trisna answers.

Then a boy approaches them. "This is how you catch a dragonfly," he said.

"See? We got it!" The boy says proudly. Trisna looks at the dragonfly sadly. She wants him to release it.

Luckily the dragonfly is still able to fly. Look, there's a spider web! That gives Trisna an idea!

"Let's make a racquet!"  
Trisna suggests. "But not  
that kind, of course, Sukma!"

“First, we have to prepare the banana leaf midribs and the bamboo stick. We will use them to make the frame.”

"And then we can use the spider web for its net."

We did it!

Dragonfly has four wings.  
The body is divided into  
parts. Its eyes look funny.  
And, it has six legs!  
So, dragonfly is categorized  
into insects!

Fly away, Dragonfly!  
Thank you for helping us  
understand you.
